## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1- 19 are allowed.

The following is an examiner's statement of reasons for allowance:

The examiner deem claims 1-16 as novel when read as a whole for the limitations of identifying a source code file and a source code line in the source code file hat generated the program instruction and identifying further processing engines having an image file containing a program instruction generated by the source code line in the source code file and manipulating respective breakpoints for selected ones of the further processing engines based upon user selection, wherein the manipulated breakpoints correspond to program instructions generated by the source code line of the source code file.

The examiner deem claims 17-19 as novel when read as a whole for the limitations of multiple line cards interconnected by the switch fabric, individual ones of the line cards comprising a network processor including multi-threaded microengines configured to execute microcode, wherein the microcode includes instructions developed using a debugger tool that identified and enabled breakpoints to be set on multiple ones of the multi-threaded microengines, wherein the breakpoints correspond to a common line of source code in a common source code file.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

*Conclusion*

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO 892.
